Listing of the Claims

Please cancel Claims 6-7, 14-15 and 17-21. Please amend Claims 1-4 and 9-12, as follows:

1.   (**Currently Amended**) A method in a computer system for generating a display page, the method comprising:

receiving a request to **generate** ~~present~~ a display page**, wherein**

> **the display page comprises realtime information and non-realtime**
> > **information,**
>
> **realtime information comprises information capable of being**
> > **retrieved or generated without significant delay, and**
>
> **non-realtime information comprises information for which retrieval**
> > **or generation will result in significant delay**;

retrieving **the** realtime information to be included on the **requested** display page;

if a previously cached version of the non-realtime information is available,

> **generating the requested display page comprising the retrieved**
> **realtime information and the previously cached non-realtime**
> **information; and**

if a previously cached version of the non-realtime information is not

> **available,**
>
> **generating the requested display page comprising the retrieved**
> > **realtime information and an indication that the non-realtime**
> > **information is not yet ready for display,**
>
> **requesting generation of the non-realtime information,**
>
> **caching the generated non-realtime information, and**
>
> **generating the requested display page comprising the retrieved**
> > **realtime information and the cached non-realtime information**
> > **in response to a subsequent request for the requested display**
> > **page.**

~~requesting that a computation be performed to generate non-realtime~~

> ~~information to be included on the display page;~~

- 2 -

~~creating a display page that contains the retrieved realtime information and~~
~~an indication that the non-realtime information is not yet ready to be~~
~~included on the display page; and~~
~~sending to a user computer system the created display page for displaying to~~
~~a user~~
~~wherein when the display page is next requested, the created display page~~
~~includes the non-realtime information if the computation has been~~
~~completed.~~

2.   (**Currently Amended**) The method of claim 1 wherein said generating the requested display page comprising an indication that the non-realtime information is not yet ready for display further comprises:

<u>including</u> ~~the indication that the non-realtime information is not ready to be~~
~~included on the display page includes~~ a link for requesting the display
page.

3.   (**Currently Amended**) The method of claim 1 wherein the request to <u>generate</u> ~~present~~ the display page is received from a user.

4.   (**Currently Amended**) The method of claim 1 wherein the request to <u>generate</u> ~~present~~ the display page is received when a user logs on to <u>**one of**</u> the computer system <u>**and a client coupled to the computer system**</u>.

5.   (Original) The method of claim 4 wherein the display page is a homepage.

6-7.   **Canceled.**

8.   (Original) The method of claim 1 wherein the generated information includes a graphical representation of information.

9.   (**Currently Amended**) A computer system for generating a display page of business information, comprising:

    a component **configured to retrieve** ~~that retrieves~~ realtime business information to be included on the display page;

    a component **configured to request performance of** ~~that requests that~~ a computation ~~be performed~~ to generate non-realtime business information to be included on the display page **and to cache the generated non-realtime business information**;

    a component configured to,

        if a cached version of the non-realtime business information is available, generate the display page comprising the realtime business information and the cached non-realtime business information, and

        if a cached version of the non-realtime business information is not available,

        generate the requested display page comprising the retrieved realtime information and an indication that the non-realtime information is not yet ready for display,

        request generation of the non-realtime information,

        cache the generated non-realtime information, and

        generate the requested display page comprising the retrieved realtime information and the cached non-realtime information in response to a subsequent request for the requested display page; and

    ~~a component that adds to the display page the retrieved realtime business information, when the non-realtime business information is not yet ready, an indication that the non-realtime business information is not yet ready to be included on the display page, and when the non-realtime business information is ready, the generated non-realtime information; and~~

    a component **configured to send** ~~that sends~~ to a user computer system the display page for display to a user so that the user can view the realtime

information **if ~~even though~~** the non-realtime business information is not yet ready.

10. (**Currently Amended**) The computer system of claim 9 wherein the component configured to generating the requested display page comprising an indication that the non-realtime information is not yet ready for display is further configured to include **~~the indication that the non-realtime business information is not ready to be included on the display page includes~~** a link for requesting the display page.

11. (**Currently Amended**) The computer system of claim 9 wherein a request to **generate ~~present~~** the display page is received from a user.

12. (**Currently Amended**) The computer system of claim 9 wherein a request to **generate ~~present~~** the display page is received when a user logs on to **one of** the computer system **and a client coupled to the computer system**.

13. (Original) The computer system of claim 12 wherein the display page is a homepage.

14-15. **Canceled.**

16. (Original) The computer system of claim 9 wherein the generated business information includes a graphical representation of the business information.

17-21. **Canceled.**

22. (**New**) The method of Claim 1 further comprising:
if a previously cached version of the non-realtime information is available,
    requesting re-generation of the non-realtime information subsequent to
        said generating the requested display page comprising the
        previously cached non-realtime information,
    caching the re-generated non-realtime information, and

generating the requested display page comprising the retrieved realtime

information and the cached re-generated non-realtime information

in response to a subsequent request for the requested display page.

23.   (New) A computer-readable storage medium comprising program

instructions executable to:

receive a request to generate a display page, wherein

the display page comprises realtime information and non-realtime

information,

realtime information comprises information capable of being retrieved or

generated without significant delay, and

non-realtime information comprises information for which retrieval or

generation will result in significant delay;

retrieve the realtime information to be included on the requested display page;

if a previously cached version of the non-realtime information is available,

generate the requested display page comprising the retrieved realtime

information and the previously cached non-realtime information; and

if a previously cached version of the non-realtime information is not available,

generate the requested display page comprising the retrieved realtime

information and an indication that the non-realtime information is

not yet ready for display,

request generation of the non-realtime information,

cache the generated non-realtime information, and

generate the requested display page comprising the retrieved realtime

information and the cached non-realtime information in response

to a subsequent request for the requested display page.
